

PRESS RELEASE

Grenchen, September 29, 2017

New Thommen Medical app

An attractive design, intuitive operation and useful functions – that's the new app from Thommen Medical.

Users are guaranteed mobile access to company and product information anytime with the app. But it doesn't just stop there – the app has an animation that lets you zoom in and rotate the implant connection in a playful way. The animation gives you direct access to more information about the individual product features. You now also have direct access to current instructions for use and treatment concepts anytime, no matter whether you're on the move, or working chairside. Additional design options let you make your own notes directly in the app and exchange them per email, or to download documents to your own tablet or smartphone.

This practical tool is available for you in German, English, French and Chinese. The Thommen app is designed for Apple iOS and Android operating systems and can be downloaded free of charge from the Apple Store or Google Play Store.
