Dental Implant Center, Continuous Learning Center

Meeting patient expectations for immediate fixed restorations and superior final outcomes can be challenging. Many times, the two cannot coexist. Is there a strategy that can solve both goals? Patient demands of immediacy and esthetics add to the clinical challenge. What is the best way to move a patient from existing dentition through transitional temporization?

This course will introduce the clinician to best practice principles for use of immediate, transitional, or delayed provisional implant restorations thereby preserving hard and soft tissue issues. Live patient clinical treatment will outline the restorative pathway for developing and delivering exceptional immediate function provisional restorations.

Dr. McFadden lectures nationally and internationally on dental implant treatment. He received his dental degree from the University of Pittsburgh School of Medicine and his Certificate of Prosthodontics from Baylor College of Dentistry. He was awarded Board Certification by the American Board of Prosthodontics in 1995 and by the

American Board of Oral Implantology in 2012. After nine years as a professor at UT Southwestern Medical Center, where he established the Dental Implant Center at Southwestern, Dr. McFadden opened his private practice and continuing education center at McFadden Dental Implant Center in 2002 in Dallas, Texas.

Dr. Daniel Tan received his dental degree from the National University of Singapore. After several years of practice, he then went on to obtain his specialty certification in Advanced Prosthodontics from the University of Southern California. Dr. Tan is currently in full time private practice at the McFadden Dental Implant Center where

he works with Dr. McFadden in the management of patients undergoing complex full-mouth rehabilitation. As part of the team, he provides prosthodontic support, aided by his keen eye for detail, knowledge of dental literature, and commitment to providing the very best treatment for his patients.

Objectives:

- Gain understanding of the restorative parameters used for tissue preservation through proper use of provisional restorations
- Treatment plan the edentulous and partially edentulous patient for full arch/full mouth implant treatment
- Review basic restorative protocols and instrumentation used in full arch/ full mouth implant treatment
- Review timing of immediate provisional restorations (single to full arch)
- Review transitioning patients from failing dentition to full-arch implant restorations
- Case presentation and discussion of completed full arch/full mouth implant treatments

Details:

Day One

Live surgical patient. One arch or full mouth treatment will be demonstrated.

Day Two

Review of Day One patient treatment. Full arch/ full mouth patient treatment review with open discussion.

Dates: Thursday, May 11th, 2023
Friday, May 12th, 2023

Credit: AGD credit will be provided

Tuition: \$5000 for both sessions

Length: 12 Hours

Location: McFadden Dental Implant Center
5120 W Lovers Ln (Lovers at Inwood Rd)
Dallas, TX. 75209

Registration: For more information or to register, call **214-956-9100** or visit **www.DICCLC.com**.

Cancellation: 60+ days = Full Refund
31-60 days = 50% Refund
30 days or less = No Refund and option to reschedule once for another upcoming course
